The plant flooded due to heavy rains and the rise of the river. Bart and I pulled manholes to narrow down the source of the water. We found a pipe going to the river from manhole 230 by the Judd Ave pump station. It must have been installed as an overflow in case of a pump station malfunction. In this case, the river rose up and flowed into the manhole. It is blocked with sandbags as a temporary fix. Removal of the pipe in the spring is necessary.

Number 1 septage bed decant valve with the correct flange finally arrived from being on backorder.

Respectfully

Lyle Sommers Superintendent Kent WPCA
