DATA SOURCES
Most data were obtained from the Environmental GIS Data distributed by the Connecticut DEP. Roads, lakes, and streams are based on USGS DLG files. Road data were enhanced through the use of GPS, digital orthophotos, and town review. The Appalachian Trail was obtained through the use of a GPS receiver with 2-5 meter positional accuracy.

Landcover Types are from the University of Connecticut's Center for Landuse Education And Research (CLEAR) 2006 landcover data, and the accuracy is affected by the resolution, categories, and date collected.

This map is not to be construed as an accurate survey and is subject to change.
