CT State Wide Respite Care Program

Connecticut Statewide Respite Care Program offering daytime or overnight relief for caregivers of individuals with Alzheimer’s or related dementias.

Respite care provides a break, or a time of caregiver relief, from the constant physical and emotional stress of caring for a person with Alzheimer’s disease or a related dementia. The task of caring for a person with dementia is overwhelming. Family caregivers often develop stress-related illnesses such as heart disease, hypertension, or ulcers. An occasional break allows an exhausted caregiver to regroup, both physically and emotionally, and to find the strength to carry on. Respite truly saves caregiver’s lives. With financial assistance, many family caregivers who would not otherwise use this service will have the opportunity to obtain temporary relief for themselves. As a result, the individual with dementia may remain at home for much longer than would otherwise be possible.

The Connecticut Statewide Respite Care Program is funded by the State Department on Aging and is operated in partnership with the Connecticut Area Agencies on Aging and the Connecticut Chapter of The Alzheimer’s Association. The program offers families the opportunity to receive an assessment of services needed and have a care plan developed that includes the provision of services for the individual with dementia. Eligible families may apply for daytime or overnight respite care services that may include: Adult day care, cognitive fitness training, home health aide, homemaker, companion, personal care assistants, skilled nursing care or short-term nursing care.
