DATA SOURCES
Lakes, streams, town boundaries, railroad, dams, and boat launches were obtained from the Environmental GIS Data distributed by the Connecticut DEP. Roads are based on USGS DLEE files and enhanced through the use of GPS, digital orthophotos, and town review. The Appalachian Trail was obtained through the use of a GPS receiver with 2.5 meter positional accuracy.

Parcel boundaries were digitized from tax assessor’s maps with an RMS <= 0.003 and updated through December 2008. Some adjustments to parcel boundaries were applied, based on land surveyor maps, by Jos Spielbos working as a volunteer for the Kent Conservation Commission.

This is not to be construed as an accurate survey and is subject to change.
